

# **THANK YOU CONGRESS for Voting to Make A Difference in the Lives of Millions**

## **Americans Faced with Kidney Disease and Kidney Failure to Benefit**

Over 75,000 kidney patients from the National Kidney Foundation (NKF) and Dialysis Patient Citizens (DPC) thank you for your support of quality kidney care and meaningful reform for Medicare's End Stage Renal Disease (ESRD) benefit. Because of your efforts, the millions of Americans who have chronic kidney disease (CKD) and the millions more who are at risk will have greater access to resources to fully understand their treatment choices and learn how to best manage their disease. Education is key in the fight against this disease and with the new provisions in the Medicare bill, we are better equipped to tackle kidney disease head on.

**Thank you, Congress, for your historic vote to ensure  
quality kidney care for patients nationwide.**
