

NORC at the University of Chicago is working with the Centers for Medicare and Medicaid Services (CMS) to make improvements to the Dialysis Facility Compare website that provides consumers with information about the quality of Dialysis Facilities in the U.S. The webpage can be accessed here: <http://www.medicare.gov/dialysisfacilitycompare/search.html>.

We plan to conduct discussions with users or potential users of this website to inform changes and improvements CMS is making. Discussions will be conducted via telephone with a web-based component (participants will be asked for their opinions of different website content).

We are recruiting approximately eight participants who:

- Are currently undergoing in-center hemodialysis
- Would be interested in looking at dialysis facility quality information online
- Are available for a 30 minute discussion between Monday December 15<sup>th</sup> and Friday December 19<sup>th</sup> (we can schedule the time around your availability within these dates)
- Have use of a telephone and computer with internet access

If you meet the listed characteristics and would like to help CMS improve the way dialysis facility quality information is presented on their website to better meet the needs of people affected by ESRD, please contact Rebecca Catterson at [Catterson-rebecca@norc.org](mailto:Catterson-rebecca@norc.org) and please reference DFC-B.
